

## MATH+ Postdoctoral Membership Application Procedure

Dear prospective postdoctoral MATH+ member,

Thank you for your interest in becoming a postdoctoral member of MATH+.

There is no official application form, instead you should e-mail the following documents to our Postdoc Liaison Officer Dr. Theo A. Roelofs: [roelofs@math.tu-berlin.de](mailto:roelofs@math.tu-berlin.de).

- a cover letter explaining why you want to join MATH+ as a postdoctoral member, including a statement in what area of the cluster (Application Areas, Emerging Fields, BMS Research Training Areas, ...) you see yourself contributing,
- an up-to-date CV, including a list of publications,
- a letter of recommendation from a MATH+ faculty member (typically the head of your research group).

The letter of recommendation should include a short description up to the present date about your academic/working relationship with the person recommending you and their plans for future projects with you. They should then say why they recommend you to become a MATH+ postdoc. They should write it in the form of a letter, but it can be sent directly to Theo Roelofs ([roelofs@math.tu-berlin.de](mailto:roelofs@math.tu-berlin.de)) by e-mail as a pdf.

Your application (incl. letter of recommendation) will be presented at the next MATH+ Board Meeting and you will be informed afterwards of the result.

As a MATH+ Postdoc we expect active participation in MATH+ events, such as the MATH+ Day, MATH+ Friday talks, or workshops organized by MATH+. Other examples include assisting with interviews during the BMS Days, or to act as an initial mentor for new Phase II students. You could also become a Postdoc representative. However, the advantages and opportunities open to you are much more. See the attached pdf for detailed information.

We hope this information helps you with your application. In case of any further questions, please do not hesitate to let us know.
